About Me

Hello! I'm **Sufiana**, an **Information Systems graduate** with a **strong** focus on **System Analysis** and **structured project** execution. I'm particularly interested in how **data**, c**lear requirements**, and **well-defined processes** contribute to building **effective** digital **solutions**.

As a **Certified System Analyst (BNSP)**, I have been involved in **managing** digital initiatives in **dynamic and professional IT environments**, working closely with **cross-functional** teams under **Agile** practices. My experience spans **product planning, requirement analysis, documentation, and ensuring that development objectives remain clear and measurable.**

During my internship as an **Associate Product Manager** and while **leading website development project**, I developed a practical understanding of stakeholder **coordination, scope control, and balancing time, quality, and resources** — while maintaining **structured documentation** throughout the project lifecycle.

I enjoy **translating complex needs** into organized system flows and actionable plans. I also build **web-based tools** and explore **automation** and **AI-powered solutions** to **streamline** repetitive processes and **improve** operational efficiency.

Education

Bachelor of Information Systems (S.Kom)
Telkom University
[2021 - 2025]

IPK (Indeks Prestasi Kumulatif) / Grade Point Average : 3,82 (out of 4,00)

FINAL PROJECT: “Development of Back-End Course Management Module on TOEFL ITP Training Website at Telkom University Language Center (LaC) with Iterative Incremental Method Using Laravel”

© 2026 Sufiana Arumdita | Extended Portfolio

Professional Experience

Associate Product Manager (Intern) | PT 4nesia Digital Solution (Jun 2024 - Aug 2024)

- **Managed Daily Scrum Meetings:** Represented the Product Manager in leading daily stand-up sessions (Tuesday–Friday), documenting team progress (Minutes of Meeting), and ensuring alignment on task priorities.
- **Participated in Agile Ceremonies:** Actively involved in Sprint Planning, Retrospectives, and Reviews for Brainys and Oasys School within the OASYS division.
- **Drafted Product Documentation:** Developed Product Requirement Documents (PRD) for 2 products, including functional requirements, technical specifications, use case diagrams, and business models for both Brainys and Oasys School.
- **System Logic & Feature Research:** Designed Activity Diagrams for both Brainys and Oasys School, and conducted feature research and brainstorming—with a primary focus on Oasys School—to define system functionalities.
- **Developed Output Templates & Guidelines:** Created and standardized various document output templates (Spreadsheets & Docs) specifically for ATP (Alur Tujuan Pembelajaran) and Kisi-kisi Soal, and authored manual book guidelines for Oasys School.
- **Monitored Project Delivery:** Reported task status and potential bottlenecks to the Product Manager using the company's internal task management system.

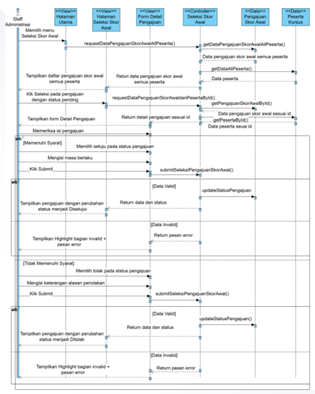
Tabel IV-13. Use Case Scenario Seleksi Skor Awal

Use Case Name	Seleksi Skor Awal
Use Case ID	UC-009
Actor	Staff Administrasi
Scenario	Pada use case ini menjelaskan tentang Staff Administrasi yang dapat menyeleksi pengajuan skor awal untuk menyetujui atau menolak pengajuan.
Pre-Condition	a. Staff Administrasi sudah berhasil masuk ke dalam website b. Terdapat pengajuan yang masih "pending" dan perlu diseleksi
Trigger	*Use case* ini dilakukan ketika Admin hendak menyetujui atau menolak pengajuan skor awal dengan memilih menu Seleksi Skor Awal.
Normal Flow	1. Admin memilih menu "Seleksi Skor Awal" 2. Sistem menampilkan halaman seleksi skor awal berisi daftar pengajuan skor awal (*timestamp*, nama lengkap, email, status pengajuan, masa berlaku, dan keterangan). 3. Admin memilih "Seleksi" pada item dengan status "pending" di daftar pengajuan skor awal 4. Sistem menampilkan form detail isi pengajuan 5. Admin memeriksa pengajuan dan dokumen pendukung 6. Admin memilih "setujui" atau "tolak" pada status pengajuan

96

Use Case Name	Seleksi Skor Awal
	7. Admin mengisi masa berlaku dokumen pendukung pengajuan berupa kalender jika memilih "setujui" 8. Admin melakukan submit 9. Sitem memvalidasi data 10. Sistem memperbarui status pengajuan menjadi "Disetujui" 11. Admin melihat perubahan status pengajuan menjadi "Disetujui" pada pengajuan yang telah diseleksi
Alternative Scenario	Jika Data Invalid Sistem meminta perbaikan pada bagian yang masih invalid Jika Pengajuan Ingin Memperbaiki Persyaratan a. Admin memilih "tolak" lalu mengimput keterangan berupa alasan pengajuan ditolak. b. Sistem memperbarui status pengajuan menjadi "Ditolak". c. Admin melihat perubahan status pengajuan menjadi "Ditolak" pada pengajuan yang telah diseleksi.
Post-Condition	Admin berhasil menyeleksi pengajuan dan menverifikasi dengan memperbarui status pengajuan menjadi "Ditolak" atau "Disetujui".
Relationship	*Include* dengan use case Login.

Use Case Scenario - Initial Score Selection



Sequence Diagram - Initial Score Selection

Problem:

- Registration, payment, and self-learning were separate (Google Form, WhatsApp, Excel)
- Manual process → human error, duplicate data, inefficient
- Administrative burden increased as participants grew

Solution:

- Built integrated course management module with Laravel
- Connected enrollment → payment → self-learning in one application

My Contribution:

- Developed back-end with Laravel, API testing with Postman
- Designed UML diagrams (use case, activity, sequence, class)
- Created use case scenarios for detailed flow
- Documented API specifications & Postman collection

Tools: Laravel, MySQL, Postman, Visual Paradigm, Google Docs, GitHub

Judul : Minutes of Meeting - [Daily Standup - Milestone 1 - Day 5]

Tanggal : 02/07/2024
Pukul : 09.00 - 09.30 WIB

Peserta:
[PM] -
[APM] -
[APM] - Sufiana Arumdita
[Desain] -
[Desain] -
[Data Analis] -

Agenda:
Pembahasan Progress Projek Tim Oasys Milestone 1

Ringkasan Daily Standup:
[APM] - Sufiana Arumdita
- **Kemarin / Telah Dikerjakan:** Membuat PRD untuk modul kisi-kisi soal dan ATP, melengkapi PRD bagian functional requirements, dan merancang activity diagram
- **Hari Ini / Akan Dikerjakan:** Mereview PRD yang sudah dikerjakan dan membuat contoh dokumen output generate templat
- **Hambatan:** Belum ada

[Desain] -
- **Kemarin / Telah Dikerjakan:** Mengeksplor copywriting untuk desain post social media dan melanjutkan UI/UX design bagian Biur timeline
- **Hari Ini / Akan Dikerjakan:** Melanjutkan UI/UX design dan mengeksplorasi bahan untuk desain post social media
- **Hambatan:** Belum ada

Minutes of Meeting - Daily Standup (Progress, Plans, Blockers)

Problem:

- Indonesian teachers needed efficient, adaptable syllabus creation
- Traditional methods were time-consuming

Solution:

- AI-powered syllabus generation platform

My Contribution:

- Created PRD (user personas, key features, etc)
- Led daily standups, documented MoM
- Managed kanban board for sprint tracking
- Designed use case diagrams, activity diagrams
- Documented functional requirements

Tools: Kanban Board, Visual Paradigm, Google Docs, Spreadsheet, Canva

DrafTyp (Document Generator)

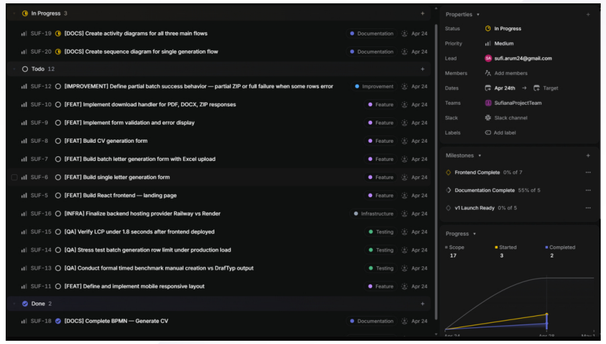
BRD DrafTyp - Smart Document Generator Platform 2026-04-09 - Version 1.0

By Sufiana Arumdita · 6 min

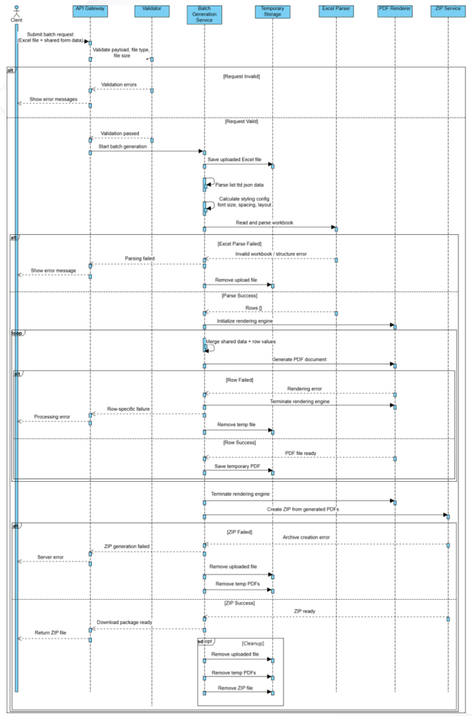
Document Information

Field	Detail
Document Title	BRD DrafTyp — Smart Document Generator Platform
Version	1.0
Status	Approved
Author	Sufiana Arumdita
Date Created	April 2026
Last Updated	April 2026
Document Type	Business Requirements Document
Related Document	PRD DrafTyp v1.0

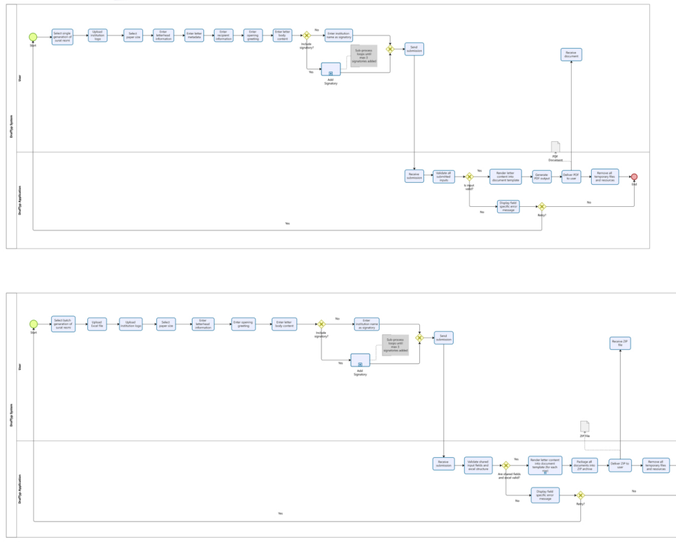
Document Information on BRD DrafTyp



Project Management — Linear Issues List



Sequence Diagram - Batch Formal Letter Generation Flow



BPMN Generate Formal Letter Process

Problem:

- Creating formal documents manually is time-consuming — workers lose hours daily to formatting and recreation (Foxit, Glean)
- General-purpose tools lack batch capability — each recipient requires separate manual effort

Solution:

- Automated document generator — single or batch via Excel, output as ZIP in seconds, no manual formatting.

My Contribution:

- Designed full system architecture and built from scratch
- Produced BRD and PRD covering stakeholder analysis, business rules, FR/NFR, user stories, and acceptance criteria
- Created SA artifacts: Use Case Diagram, Sequence Diagram, System Architecture Diagram, etc
- Documented complete API using Postman collection
- Tracked remaining work and open issues using Linear with defined milestones

Tools: Node.js, React, Postman, Draw.io, Visual Paradigm, Bizagi, Confluence, Linear

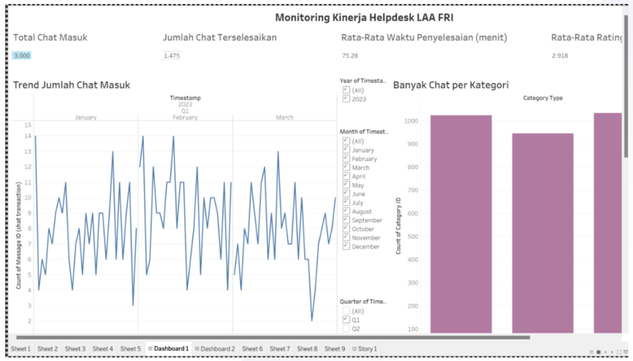
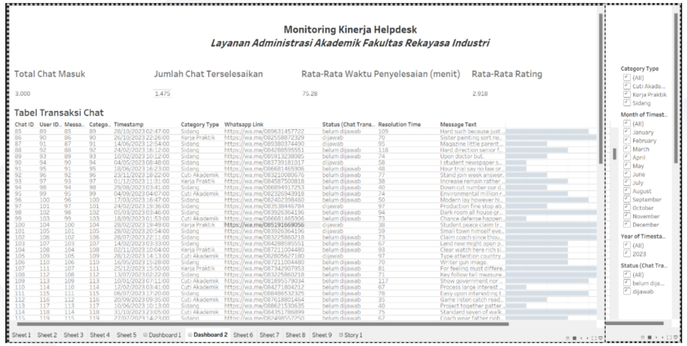
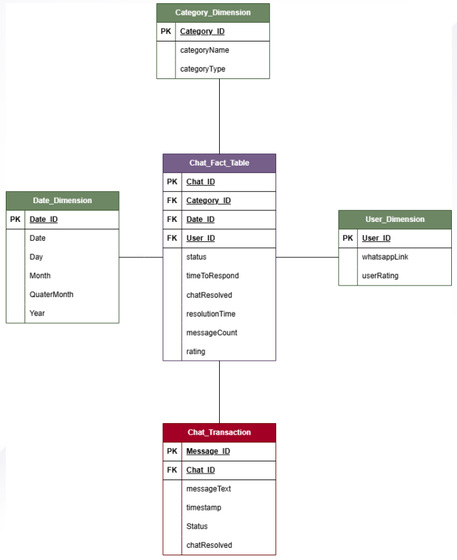
Helpdesk Monitoring Dashboard (Tableau)



Dashboard Overview - SLA Performance Metrics



Helpdesk Transaction Details Dashboard



Star Schema for Data Warehouse

I.3 Alternatif Solusi

Tabel I- 1 Alternatif Solusi 1

Solusi 1			
Solusi	**Deskripsi**	**Kelebihan**	**Kekurangan**
Membangun Sistem Monitoring Otomatis berbasis Chatbot dan API WhatsApp yang akan memvisualisasikan dashboard berdasarkan data pertanyaan pada Chatbot menggunakan Tableau.	Solusi ini melibatkan pembuatan sistem *monitoring* otomatis berbasis *chatbot* yang terhubung dengan API WhatsApp. Chatbot ini akan otomatis menerima, mencatat, dan mengklasifikasikan semua pertanyaan dari pengguna, serta menyajikan laporan *real-time* mengenai status pertanyaan (terjawab/belum terjawab). Data yang diperoleh dari database kemudian dapat diproses untuk mengidentifikasi	1. Otomatisasi penuh yang dapat meminimalkan keterlibatan manusia dalam proses pemantauan. 2. Data yang dihasilkan lebih akurat dan lengkap karena menggunakan *database* yang tersimpan di *cloud*. 3. Tidak memerlukan kemampuan pemrograman yang kompleks karena hanya menerapkan	1. Biaya pengembangan yang relatif tinggi, serta memerlukan integrasi yang cermat dengan API WhatsApp. 2. Biaya pemakaian Tableau untuk lisensi yang cukup besar untuk skala perusahaan besar dan jangka waktu yang lama. 3. Butuh pemahaman *query* yang baik pada Tableau.

Alternative Solution Identification

Problem:

- WhatsApp helpdesk managed manually
- No real-time monitoring of inquiries, response status, trends
- Manual data = inaccurate, fragmented, delayed decisions

Solution:

- Automated monitoring system with Tableau + SQL database
- Star schema designed for data warehouse
- Synthetic data generated with Python based on SLA requirements

My Contribution:

- Analyzed SLA requirements & business needs (BA)
- Designed star schema & SQL database structure
- Built interactive Tableau dashboard for real-time visibility
- Validated dashboard with Organization representatives

Tools: Tableau, SQL, Python, Draw.io, Google Docs

SPRINT 2 RETROSPEKTIF

Berikut adalah ringkasan mengenai SPRINT Retrospektif untuk SPRINT 2 Tim DEDIKASI Web Project.

1. **Pain Points & Challenges**
   - Miskomunikasi

   Terkadang terjadi miskomunikasi akibat komunikasi cenderung via online saja. Miskomunikasi membuat kesalahpahaman dalam alur dan pengerjaan fitur.

   - Penggunaan sourcetree

   Selain itu, kami mengalami kesulitan dalam penggunaan sourcetree ketika menemukan konflik yang kompleks hal ini karena kami belum pernah menggunakan alat ini sebelumnya, sehingga perlu banyak belajar.

   - Konflik ketika melakukan push, pull, atau merge

   Konflik yang kompleks menghambat pengerjaan fitur lainnya, hal ini karena ada fitur yang dapat di run dengan maksimal jika fitur lainnya sudah selesai. Sementara fitur yang diperlukan itu terhambat karena konflik bahkan konflik juga terkadang menyebabkan beberapa file hilang atau kembali ke versi commit yang sebelumnya yang mungkin disebabkan ada anggota tim yang lupa untuk pull terlebih dulu

   - Pada SPRINT 2 ini terdapat penggantian PBI

   Dilakukan **Backlog Refinement** secara responsif terhadap US59. Mengingat tingkat kompleksitas dan dependensi teknis yang tinggi pada periode Sprint ini, tim melakukan mitigasi dengan menggantinya ke PBI yang memiliki tingkat kesiapan teknis lebih tinggi demi memastikan target fungsionalitas sistem tetap terpenuhi sesuai jadwal.

   US59 pada sprint planning SPRINT 2 sebelumnya:
   "Peserta ingin melihat deadline assignment sehingga dapat mengetahui tenggat waktu pengerjaan tugas yang harus dikumpulkan"
   diganti menjadi:
   "Peserta ingin melakukan unenroll course sehingga dapat membatalkan atau menghentikan pelatihan yang diikuti"

2. **Action Plan & Mitigation Strategy**
   - Memiliki folder backup untuk mengantisipasi file yang hilang
   - Memaksimalkan komunikasi baik secara online maupun offline dan mendiskusikan terlebih dahulu secara bersama sama, mengenai alur fitur serta langkah pengerjaannya sebelum mulai develop fitur
   - Memperlajari lebih lanjut dalam menggunakan sourcetree atau menggunakan alternatif lain seperti melalui terminal saja
   - Rutin melakukan pengecekan dan test integrasi fitumya
   - Menghindari commit file tertalu besar atau dalam jumlah yang banyak agar tidak terlalu kompleks konflik nya
   - Saling mengingatkan untuk melakukan pull terlebih dahulu sebelum commit

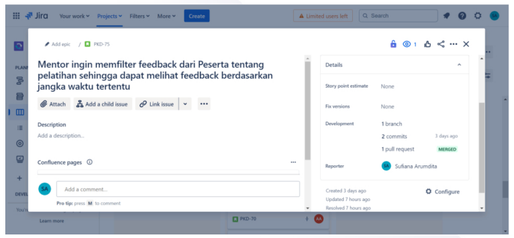
3. **Team Strengths & Successes**
   - Kolaborasi

   Kolaborasi kami dalam pengerjaan fitur dapat dikatakan baik, meskipun terdapat miskomunikasi ataupun kendala lainnya. Hal ini dapat ditingkatkan lagi.
   - Kedisiplinan dalam daily report maupun commit

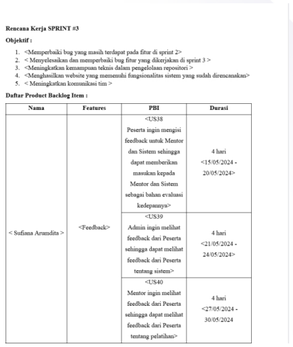
   Tim kami sudah disiplin dalam melakukan commit dan report sehingga hal ini dapat ditingkatkan lagi.
   - Problem solving

   Tim kami dapat memanfaatkan kreativitas dalam menemukan solusi dari permasalahan selama pengembangan proyek. Hal ini dapat ditingkatkan lagi.

Sprint Retrospective - Team Reflection



Jira Commit - Task Progress



Rencana Kerja SPRINT #3

Objektif :

1. <Memperbaiki bug yang masih terdapat pada fitur di sprint 2>
2. < Menyelesaikan dan memperbaiki bug fitur yang dikerjakan di sprint 3 >
3. <Meningkatkan kemampuan teknis dalam pengelolaan repository >
4. <Menghasilkan website yang memenuhi fungsionalitas sistem yang sudah direncanakan>
5. < Meningkatkan kekompakan tim >

Daftar Product Backlog Item :

Nama	Features	PBI	Durasi
< Sufiana Arumdita >	<Feedback>	<US38 Peserta ingin mengisi feedback untuk Mentor dan Sistem sehingga dapat memberikan masukan kepada Mentor dan Sistem sebagai bahan evaluasi kedepannya>	4 hari <15/05/2024 - 20/05/2024>
		<US39 Admin ingin melihat feedback dari Peserta sehingga dapat melihat feedback dari Peserta tentang sistem>	4 hari <21/05/2024 - 24/05/2024>
		<US40 Mentor ingin melihat feedback dari Peserta sehingga dapat melihat feedback dari Peserta tentang pelatihan>	4 hari <27/05/2024 - 30/05/2024

Sprint Plan - Objectives & Timeline

Problem:

- Unemployment among diploma/university graduates at 5.10% (BPS, 2023)
- Indonesia ranks 45th in digital competitiveness → need for upskilling

Solution:

- Free learning platform for fresh graduates in information systems

My Contribution:

- Led development team using Agile (Jira, daily scrums, sprint planning/reviews/retrospectives)
- Managed backlog & task tracking
- Contributed to coding several features (Laravel, MySQL)
- Coordinated communication via Slack & Google Docs

Tools: Laravel, MySQL, Jira, Slack, Google Docs, GitHub

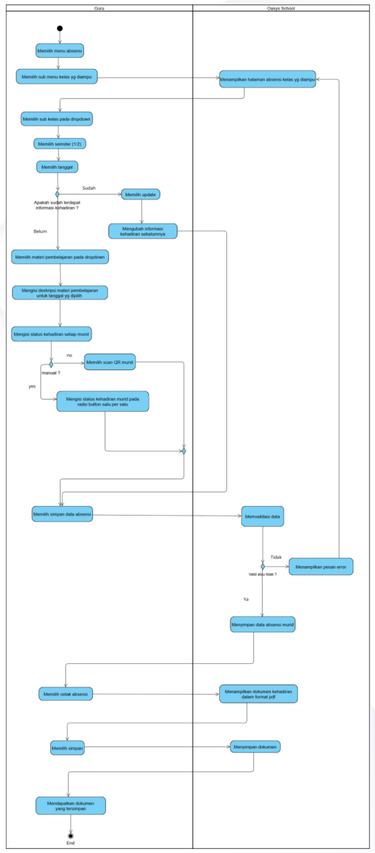
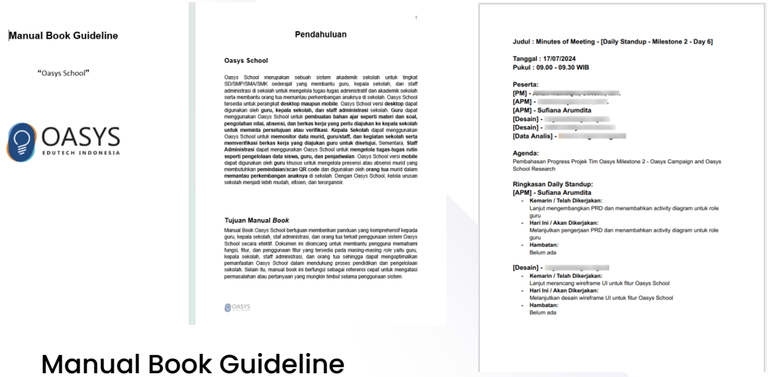
Customer Needs Analysis



Activity Diagram -
Managing Student Attendance

Functional Requirements - Feature Specifications



Manual Book Guideline

Minutes of Meeting -
Daily Standup
(Progress, Plans, Blockers)

Problem:

- Schools needed integrated system for teachers, principals, staff, parents
- Tasks like attendance, report cards, teaching materials were fragmented

Solution:

- Integrated school management system (web + mobile)

My Contribution:

- Created PRD (multi-platform; QR attendance, digital report cards, etc)
- Developed user personas for 4 roles
- Designed activity diagrams for core workflows (materials, attendance, grades)
- PRD + functional requirements + flow design = nearly 100 pages
- Led daily standups, documented MoM
- Created manual book & guideline for end users

Tools: Kanban Board, Miro, Visual Paradigm, Google Docs, Canva

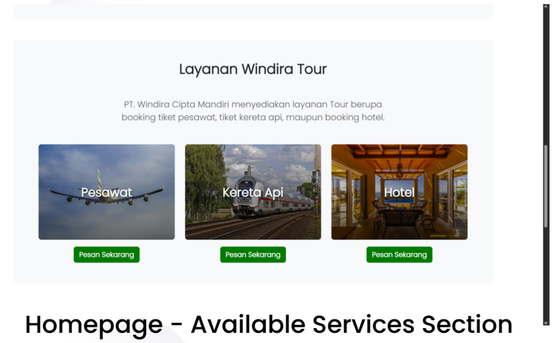
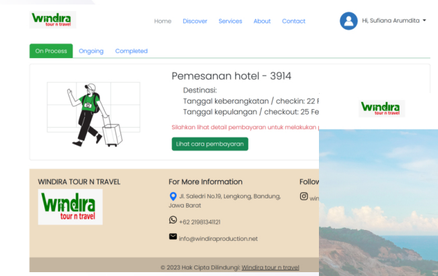
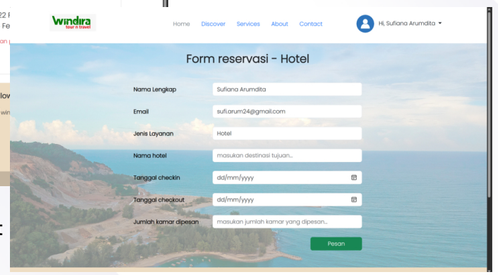
Risk Management Plan



Homepage - Available Services Section



Reservation with On Process Status - Awaiting Admin Confirmation & Payment (Customer View)



Hotel Reservation Form

Problem:

- Travel agency still took manual reservations (phone, office visits)
- Inefficient, time-consuming, prone to human error

Solution:

- Full-stack travel booking website with Laravel & MySQL

My Contribution:

- Developed full-stack application (tour packages, reservations, payments)
- Led project management: stakeholder coordination, Gantt chart, risk management plan, and create other project management documentations
- Dual role as developer & project manager

Tools: Laravel, MySQL, Google Docs, Gantt Chart, Miro, Speadsheet, GitHub

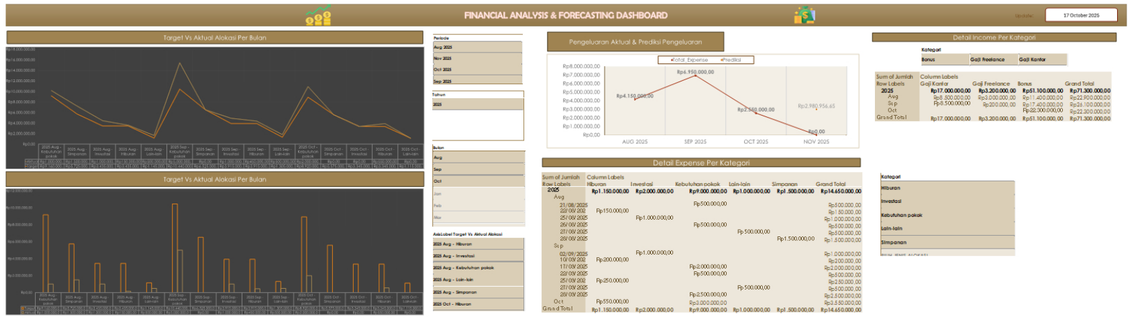
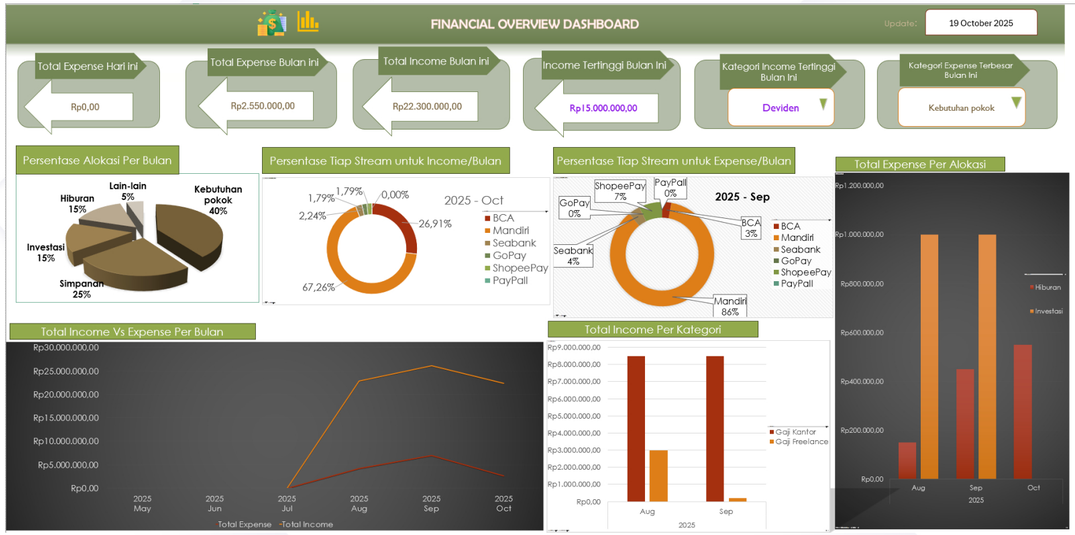
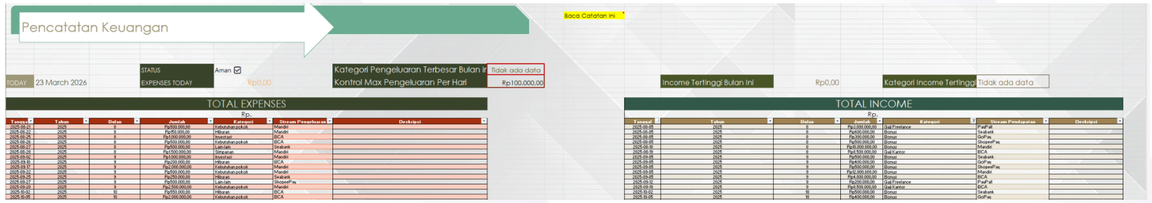
Personal Financial Tracker (Excel)



Financial Analysis & Forecasting Dashboard - Detailed Analysis & Prediction



Financial Overview Dashboard - Daily & Monthly Financial Snapshot



Detailed Income & Expense Input Sheet

Problem:

- Need to track daily income, expenses, and budgeting
- No structured tool for financial planning & forecasting

Solution:

- Excel-based personal finance tracker with two dashboards

My Contribution:

- Designed category structure (income streams, expenses)
- Implemented custom budgeting allocation (BA)
- Built Financial Overview & Analysis & Forecasting dashboards
- Integrated pivot tables & formulas for dynamic analysis

Tools: Excel (Formulas, Pivot Tables)

BA Data

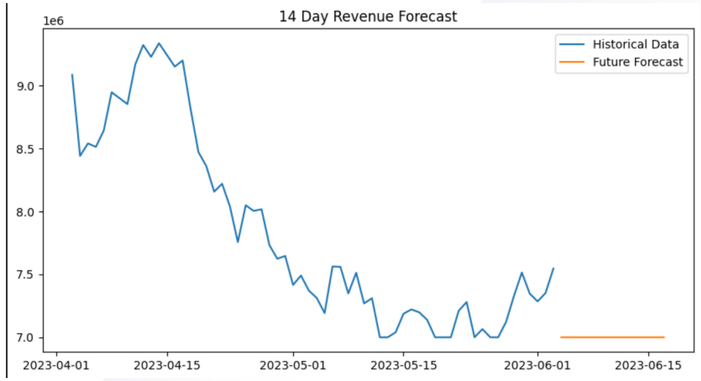
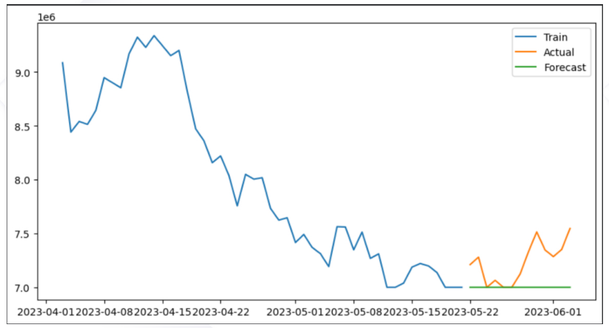
Transjakarta Revenue Prediction with ARIMA



14-Day Revenue Forecast



Training, Actual, and Forecast Comparison

```python
forecast = model_fit.forecast(steps=len(test))

test_forecast_df = pd.DataFrame({
    "date": test.index,
    "actual": test.values,
    "forecast": forecast
})

test_forecast_df = test_forecast_df.reset_index(drop=True)

test_forecast_df.to_csv("transjakarta_test_forecast.csv", index=False)

print(test_forecast_df.head())

forecast
```

Forecasting Model and Save to CSV

```python
# ubah ke dataframe
ts = daily_revenue.reset_index()
ts.columns = ['date','total_pay']

ts['synthetic'] = False

ts
```

	date	total_pay	synthetic
0	2023-04-03	9085500.0	False
1	2023-04-04	8441500.0	False

Total Payment by Date

Problem:

- Original dataset had limited observations → insufficient for ARIMA modeling
- Need to demonstrate forecasting pipeline with limited data

Solution:

- Synthetic time-series expansion + ARIMA model

My Contribution:

- Cleaned raw transaction data (missing values, duplicates)
- Aggregated daily revenue → time series
- Generated synthetic data with controlled noise
- Built ARIMA model, performed stationarity testing
- Produced 14-day revenue forecast

Tools: Python, Pandas, Matplotlib, ARIMA

Data

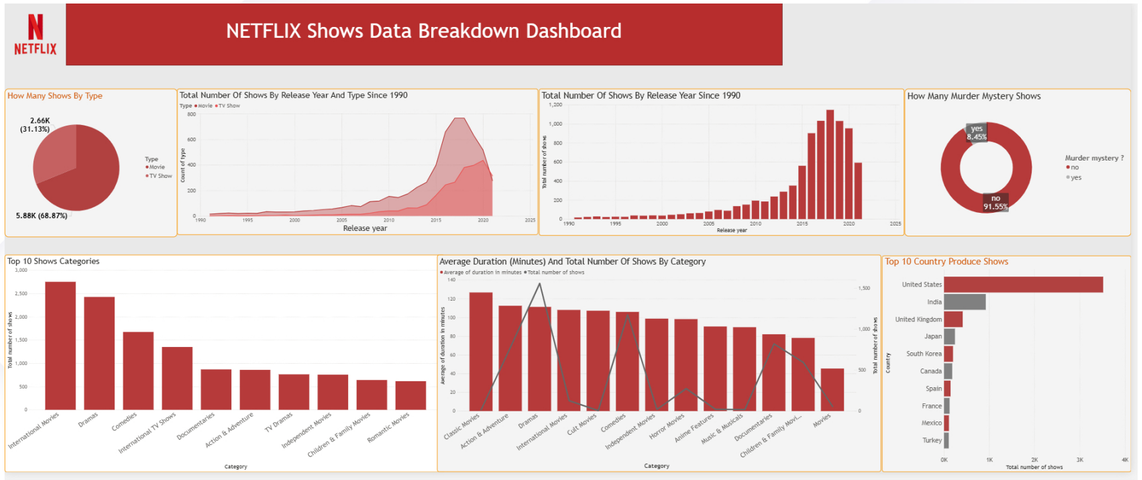
NETFLIX Shows Dashboard



Netflix Dashboard - Content Distribution, Trends & Category Insights

Problem:

- Need to explore Netflix content trends (genres, release years, country distribution) to get informative

Solution:

- Interactive Power BI dashboard from Kaggle dataset

My Contribution:

- Data cleaning & transformation with Power Query
- Built dashboard visualizing content by type, release trends, top categories, average duration, country insights

Tools: Power BI, Power Query

Data

IT Project Performance & Monitoring Dashboard

IT Project Performance & Monitoring Dashboard –
Monitor project task progress, timelines, workload, and execution performance

Problem:

- Project task progress, work status, and delays need to be monitored in a structured way.
- Estimated and actual working hours are difficult to review without visual summaries.

Solution:

- Developed an interactive dashboard to monitor IT project task progress and performance.
- Consolidated KPIs, task distribution, working hours, and overdue tasks into one dashboard.

My Contribution:

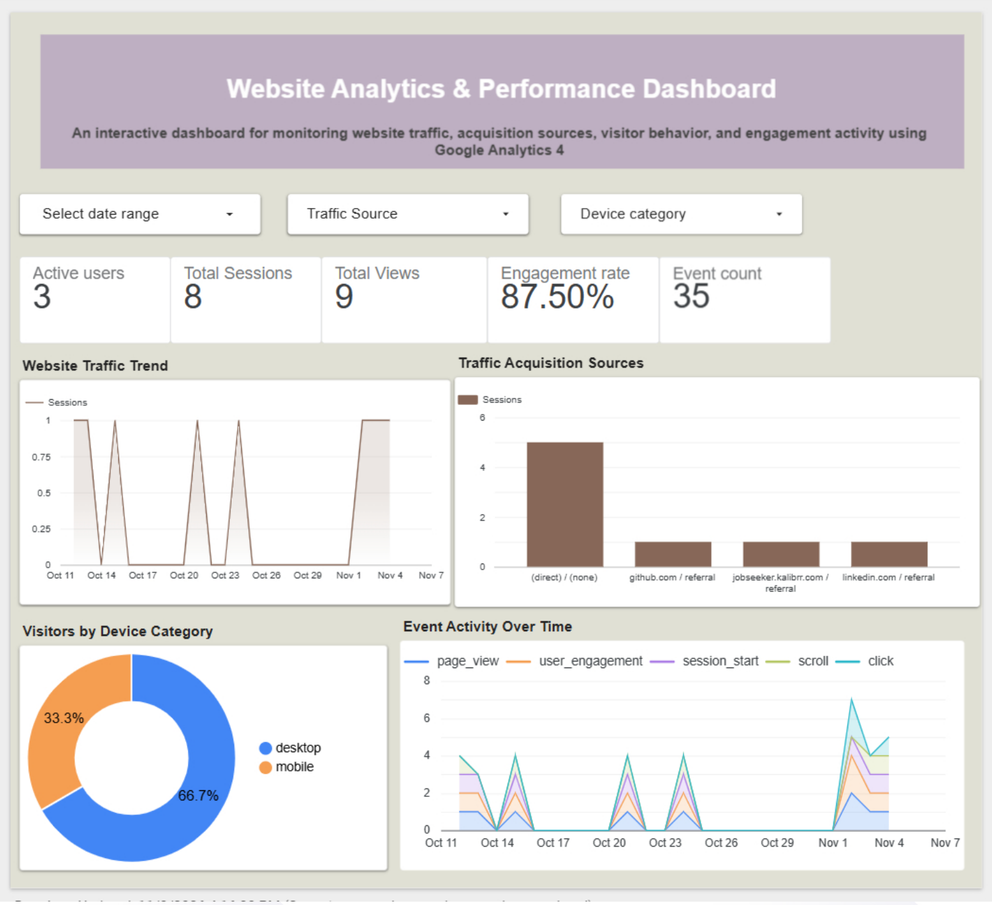
- Organized the project task dataset in Google Sheets.
- Defined project monitoring indicators.
- Built scorecards, charts, a detailed table, and interactive filters in Looker Studio.

Tools: Google Sheets, Looker Studio

Data

© 2026 Sufiana Arumdita | Extended Portfolio

Website Analytics & Performance Dashboard



Website Analytics & Performance Dashboard - Monitoring website traffic, acquisition sources, visitor behavior, and engagement activity using Google Analytics 4

Problem:

- Visitor activity on the portfolio website is not easily understood from the website interface alone.
- Traffic sources, visitor devices, and recorded activities need to be monitored.

Solution:

- Developed a Google Analytics-based dashboard to monitor website activity.
- Presented traffic trends, acquisition sources, device categories, and event activity.

My Contribution:

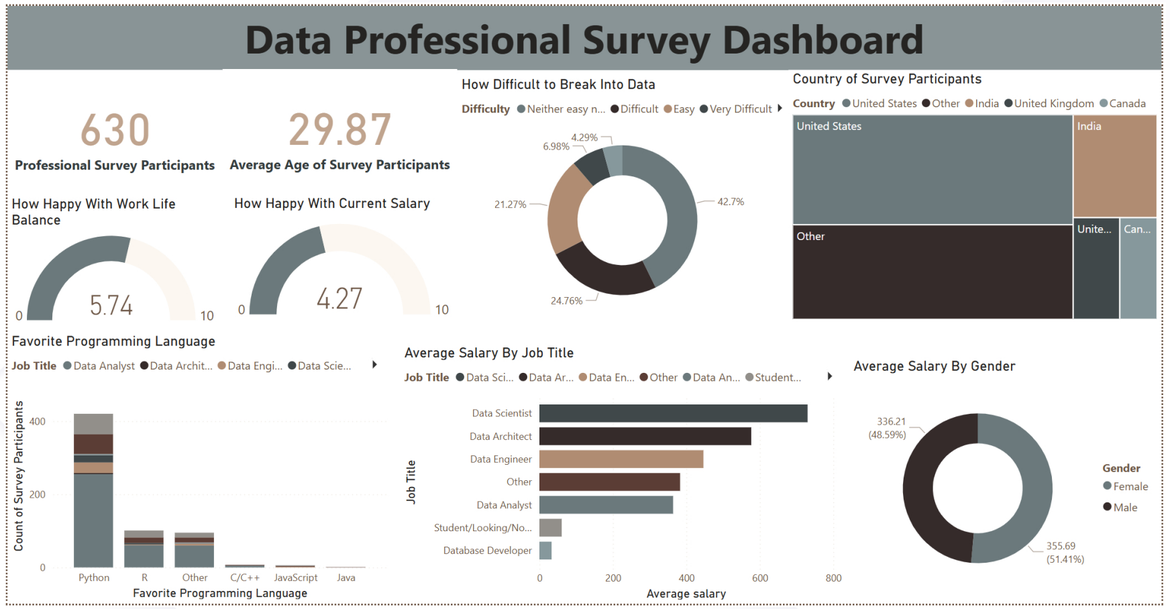
- Connected Google Analytics data to Looker Studio.
- Selected key metrics for website monitoring.
- Built scorecards, traffic visualizations, event activity charts, and interactive filters.

Tools: Google Analytics, Looker Studio

Data

© 2026 Sufiana Arumdita | Extended Portfolio

Data Professional Survey Dashboard



Data Professional Survey Dashboard - Job Satisfaction, Salary & Tool Preferences

Problem:

- Needed insights into data professionals' job satisfaction, salaries, tool preferences

Solution:

- Power BI dashboard from public survey dataset

My Contribution:

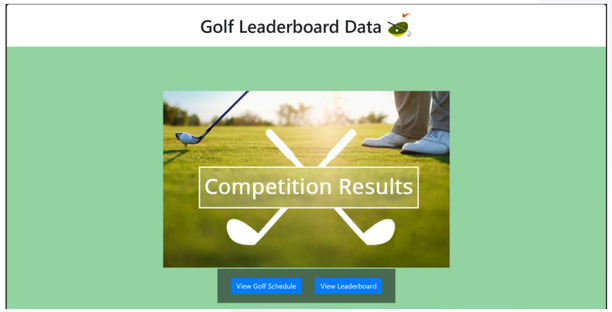
- Data cleaning & transformation with Power Query
- Visualized demographics, salary by job title/gender, programming languages, work-life balance, difficulty breaking into data field

Tools: Power BI, Power Query

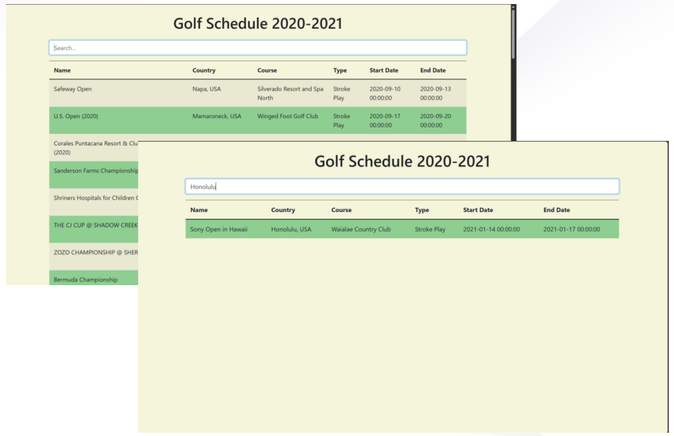
Data

© 2026 Sufiana Arumdita | Extended Portfolio

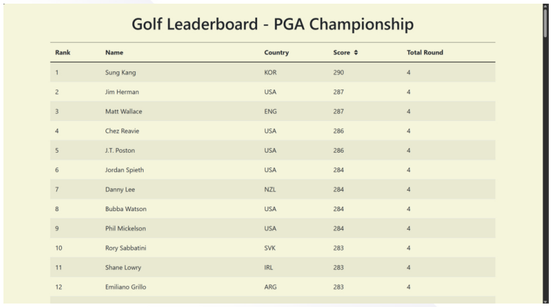
Golf Leaderboard & Schedule Website



Homepage - Tournament Schedule & Leaderboard



Schedule Page - Filtered by Keyword



Leaderboard Page - Player Rankings & Scores

Problem:

- Need easily accessible, well-organized golf event information

Solution:

- Flask web application fetching data from external API

My Contribution:

- Developed web with Python Flask and customized style with bootstrap
- Integrated Golf Leaderboard Data API via Requests library
- Implemented simple search & sorting for certain feature

Tools: Python, Flask, Jinja2, Requests API, Bootstrap

Web-Based

© 2026 Sufiana Arumdita | Extended Portfolio

Public Speaking & Event Coordination

Role: Speaker, Moderator, & Organizer
Event: Knowledge Sharing: System Analysis & Development
Date: 21 December 2024
Audience: Cross-campus students

Key Contributions & Achievements:

- Technical Speaker: Developed and presented a comprehensive module on Software Requirements Specification (SRS), focusing on:
  - Constructing SRS artifacts (Use Case Diagrams, Use Case Descriptions, and Activity Diagrams).
  - Defining Software Environment Specifications.
- Operational Execution: Managed the end-to-end workflow, from digital poster distribution and registration to moderating the live 2-hour session on Zoom.
- Quality Evaluation: Designed and analyzed participant feedback surveys to measure educational impact and session satisfaction.
- Performance Metric: Achieved an outstanding average score of 4.7/5.0 across all categories, with high praise for material clarity and delivery.
