About Me

02

Hello! I'm **Sufiana**, an **Information Systems graduate** with a **strong** focus on **System Analysis** and **structured project** execution. I'm particularly interested in how **data**, **clear requirements**, and **well-defined processes** contribute to building **effective** digital solutions.

As a **Certified System Analyst (BNSP)**, I have been involved in **managing** digital initiatives in **dynamic and professional IT environments**, working closely with **cross-functional** teams under **Agile** practices. My experience spans **product planning**, **requirement analysis**, **documentation**, and **ensuring that development objectives remain clear and measurable**.

During my internship as an **Associate Product Manager** and while **leading website development project**, I developed a practical understanding of stakeholder **coordination**, **scope control**, and **balancing time, quality, and resources** — while maintaining **structured documentation** throughout the project lifecycle.

I enjoy **translating complex needs** into organized system flows and actionable plans. I also build **web-based tools** and explore **automation** and **AI-powered solutions** to **streamline** repetitive processes and **improve** operational efficiency.

Education

Bachelor of Information Systems (S.Kom) 
Telkom University
[2021 - 2025]

IPK (Indeks Prestasi Kumulatif) / Grade Point Average : 3,82 (out of 4,00)

FINAL PROJECT: “Development of Back-End Course Management Module on TOEFL ITP Training Website at Telkom University Language Center (LaC) with Iterative Incremental Method Using Laravel”

Professional Experience

04

Associate Product Manager (Intern) | PT 4nesia Digital Solution (Jun 2024 – Aug 2024)

- **Managed Daily Scrum Meetings:** Represented the Product Manager in leading daily stand-up sessions (Tuesday–Friday), documenting team progress (Minutes of Meeting), and ensuring alignment on task priorities.
- **Participated in Agile Ceremonies:** Actively involved in Sprint Planning, Retrospectives, and Reviews for Brainys and Oasys School within the OASYS division.
- **Drafted Product Documentation:** Developed Product Requirement Documents (PRD), including functional requirements, technical specifications, use case diagrams, and business models for both Brainys and Oasys School.
- **System Logic & Feature Research:** Designed Activity Diagrams for both Brainys and Oasys School, and conducted feature research and brainstorming—with a primary focus on Oasys School—to define system functionalities.
- **Developed Output Templates & Guidelines:** Created and standardized various document output templates (Spreadsheets & Docs) specifically for ATP (Alur Tujuan Pembelajaran) and Kisi-kisi Soal, and authored manual book guidelines for Oasys School.
- **Monitored Project Delivery:** Reported task status and potential bottlenecks to the Product Manager using the company's internal task management system.

Activity Diagram - Gamification Material Template

Brainys Project (AI Syllabus Generator)

Problem:

- Indonesian teachers needed efficient, adaptable syllabus creation
- Traditional methods were time-consuming

Solution:

- AI-powered syllabus generation platform

My Contribution:

- Created PRD (user personas, key features, etc)
- Led daily standups, documented MoM
- Managed kanban board for sprint tracking
- Designed use case diagrams, activity diagrams
- Documented functional requirements

Tools: Kanban Board, Visual Paradigm, Google Docs, Spreadsheet, Canva

BRD DrafTyp - Smart Document Generator Platform 2026-04-09 - Version 1.0

By Sufiana Arumdita 6 min

Document Information

Field	Detail
Document Title	BRD DrafTyp — Smart Document Generator Platform
Version	1.0
Status	Approved
Author	Sufiana Arumdita
Date Created	April 2026
Last Updated	April 2026
Document Type	Business Requirements Document
Related Document	PRD DrafTyp v1.0

Document Information on BRD DrafTyp

Project Management — Linear Issues List

BPMN Generate Formal Letter Process

Sequence Diagram – Batch Formal Letter Generation Flow

DrafTyp (Document Generator)

Problem:

- Creating formal documents manually is time-consuming — workers lose hours daily to formatting and recreation (Foxit, Glean)
- General-purpose tools lack batch capability — each recipient requires separate manual effort

Solution:

- Automated document generator — single or batch via Excel, output as ZIP in seconds, no manual formatting.

My Contribution:

- Designed full system architecture and built from scratch
- Produced BRD and PRD covering stakeholder analysis, business rules, FR/NFR, user stories, and acceptance criteria
- Created SA artifacts: Use Case Diagram, Sequence Diagram, System Architecture Diagram, etc
- Documented complete API using Postman collection
- Tracked remaining work and open issues using Linear with defined milestones

Tools: Node.js, React, Postman, Draw.io, Visual Paradigm, Bizagi, Confluence, Linear

Helpdesk Monitoring Dashboard (Tableau)

Dashboard Overview – SLA Performance Metrics

Helpdesk Transaction Details Dashboard

Star Schema for Data Warehouse

Problem:

- WhatsApp helpdesk managed manually
- No real-time monitoring of inquiries, response status, trends
- Manual data = inaccurate, fragmented, delayed decisions

Solution:

- Automated monitoring system with Tableau + SQL database
- Star schema designed for data warehouse
- Synthetic data generated with Python based on SLA requirements

My Contribution:

- Analyzed SLA requirements & business needs (BA)
- Designed star schema & SQL database structure
- Built interactive Tableau dashboard for real-time visibility
- Validated dashboard with Organization representatives

Tools: Tableau, SQL, Python, Draw.io, Google Docs

BA

Data

I.3 Alternatif Solusi

Tabel I- 1. Alternatif Solusi 1

Solusi 1			
Solusi	Deskripsi	Kelebihan	Kekurangan
Membangun Sistem Monitoring Otomatis berbasis Chatbot dan API WhatsApp yang akan memvisualisasikan dashboard berdasarkan data pertanyaan pada Chatbot menggunakan Tableau.	Solusi ini melibatkan pembuatan sistem <i>monitoring</i> otomatis berbasis <i>chatbot</i> yang terhubung dengan API WhatsApp. Chatbot ini akan otomatis menerima, mencatat, dan mengklasifikasi semua pertanyaan dari pengguna, serta menyajikan laporan <i>real-time</i> mengenai status pertanyaan (terjawab/belum terjawab). Data yang diperoleh dari database kemudian dapat diproses untuk mengidentifikasi	- Otomatisasi penuh yang dapat meminimalkan keterlibatan manusia dalam proses pemantauan. - Data yang dihasilkan lebih akurat dan lengkap karena menggunakan <i>database</i> yang tersimpan di <i>cloud</i>. - Tidak memerlukan kemampuan pemrograman yang kompleks karena hanya menerapkan	- Biaya pengembangan yang relatif tinggi, serta memerlukan integrasi yang cermat dengan API WhatsApp. - Biaya pemakaian Tableau untuk lisensi yang cukup besar untuk skala perusahaan besar dan jangka waktu yang lama. - Butuh pemahaman <i>query</i> yang baik pada Tableau.

Rencana Kerja SPRINT #3

Objektif :

- <Memperbaiki bug yang masih terdapat pada fitur di sprint 2>
- <Menyelesaikan dan memperbaiki bug fitur yang dikerjakan di sprint 1>
- <Meningkatkan kemampuan teknis dalam pengelolaan repository>
- <Menghasilkan website yang memenuhi fungsionalitas sistem yang sudah direncanakan>
- <Memangkas komunikasi tim>

Daftar Product Backlog Item :

Nama	Features	PBI	Durasi
<Sufiana Arumdita >	<Feedback>	<US38 Peserta ingin mengisi feedback untuk Mentor dan Sistem sehingga dapat memberikan masukan kepada Mentor dan Sistem sebagai bahan evaluasi kedepannya>	4 hari <15/05/2024 - 20/05/2024>
		<US39 Admin ingin melihat feedback dari Peserta sehingga dapat melihat feedback dari Peserta tentang sistem>	4 hari <21/05/2024 - 24/05/2024>
		<US40 Mentor ingin melihat feedback dari Peserta sehingga dapat melihat feedback dari Peserta tentang pelatihan>	4 hari <27/05/2024 - 30/05/2024>

Sprint Plan - Objectives & Timeline

Problem:

- Unemployment among diploma/university graduates at 5.10% (BPS, 2023)
- Indonesia ranks 45th in digital competitiveness → need for upskilling

Solution:

- Free learning platform for fresh graduates in information systems

My Contribution:

- Led development team using Agile (Jira, daily scrums, sprint planning/reviews/retrospectives)
- Managed backlog & task tracking
- Contributed to coding several features (Laravel, MySQL)
- Coordinated communication via Slack & Google Docs

Tools: Laravel, MySQL, Jira, Slack, Google Docs, GitHub

PMO

Web-Based

Product Requirement Document

“Oasys School Project”

The logo for OASYS Edutech Indonesia features a stylized lightbulb icon on the left, composed of a blue circle with a white lightbulb shape inside, and a blue and orange circular background. To the right of the icon, the word "OASYS" is written in a large, bold, black sans-serif font, and "EDUTECH INDONESIA" is written in a smaller, black sans-serif font below it.

Cover Page of PRD OASYS School

- Schools needed integrated system for teachers, principals, staff, parents
- Tasks like attendance, report cards, teaching materials were fragmented

- Integrated school management system (web + mobile)

- Created PRD (multi-platform; QR attendance, digital report cards, etc)
- Developed user personas for 4 roles
- Designed activity diagrams for core workflows (materials, attendance, grades)
- PRD + functional requirements + flow design = nearly 100 pages
- Led daily standups, documented MoM
- Created manual book & guideline for end users

SA BA PMO Tech Writing

Travel Website Project

Problem:

- Travel agency still took manual reservations (phone, office visits)
- Inefficient, time-consuming, prone to human error

Solution:

- Full-stack travel booking website with Laravel & MySQL

My Contribution:

- Developed full-stack application (tour packages, reservations, payments)
- Led project management: stakeholder coordination, Gantt chart, risk management plan, and create other project management documentations
- Dual role as developer & project manager

Tools: Laravel, MySQL, Google Docs, Gantt Chart, Miro, Speadsheet, GitHub

Detailed Income & Expense Input Sheet

Personal Financial Tracker (Excel)

Problem:

- Need to track daily income, expenses, and budgeting
- No structured tool for financial planning & forecasting

Solution:

- Excel-based personal finance tracker with two dashboards

My Contribution:

- Designed category structure (income streams, expenses)
- Implemented custom budgeting allocation (BA)
- Built Financial Overview & Analysis & Forecasting dashboards
- Integrated pivot tables & formulas for dynamic analysis

Tools: Excel (Formulas, Pivot Tables)

BA

Data

Transjakarta Revenue Prediction with ARIMA

Problem:

- Original dataset had limited observations → insufficient for ARIMA modeling
- Need to demonstrate forecasting pipeline with limited data

Solution:

- Synthetic time-series expansion + ARIMA model

My Contribution:

- Cleaned raw transaction data (missing values, duplicates)
- Aggregated daily revenue → time series
- Generated synthetic data with controlled noise
- Built ARIMA model, performed stationarity testing
- Produced 14-day revenue forecast

Tools: Python, Pandas, Matplotlib, ARIMA

Data

14-Day Revenue Forecast

Training, Actual, and Forecast Comparison

```
forecast = model_fit.forecast(steps=len(test))

test_forecast_df = pd.DataFrame({
    "date": test.index,
    "actual": test.values,
    "forecast": forecast
})

test_forecast_df = test_forecast_df.reset_index(drop=True)

test_forecast_df.to_csv("transjakarta_test_forecast.csv", index=False)

print(test_forecast_df.head())

forecast
```

Forecasting Model and Save to CSV

```
# ubah ke dataframe
ts = daily_revenue.reset_index()
ts.columns = ['date', 'total_pay']

ts['synthetic'] = False

ts

...
```

	date	total_pay	synthetic
0	2023-04-03	9085500.0	False
1	2023-04-04	8441500.0	False

Total Payment by Date

NETFLIX Shows Dashboard

Netflix Dashboard – Content Distribution, Trends & Category Insights

Problem:

- Need to explore Netflix content trends (genres, release years, country distribution) to get informative

Solution:

- Interactive Power BI dashboard from Kaggle dataset

My Contribution:

- Data cleaning & transformation with Power Query
- Built dashboard visualizing content by type, release trends, top categories, average duration, country insights

Tools: Power BI, Power Query

Data

Data Professional Survey Dashboard

Data Professional Survey Dashboard – Job Satisfaction, Salary & Tool Preferences

Problem:

- Needed insights into data professionals' job satisfaction, salaries, tool preferences

Solution:

- Power BI dashboard from public survey dataset

My Contribution:

- Data cleaning & transformation with Power Query
- Visualized demographics, salary by job title/gender, programming languages, work-life balance, difficulty breaking into data field

Tools: Power BI, Power Query

Data

Public Speaking & Event Coordination

Role: Speaker, Moderator, & Organizer

Event: Knowledge Sharing: Techniques in System Analysis & Development

Date: 21 December 2024

Audience: Cross-campus students

Key Contributions & Achievements:

- Technical Speaker: Developed and presented a comprehensive module on Software Requirements Specification (SRS), focusing on:
 - Constructing SRS artifacts (Use Case Diagrams, Use Case Descriptions, and Activity Diagrams).
 - Defining Software Environment Specifications.
- Operational Execution: Managed the end-to-end workflow, from digital poster distribution and registration to moderating the live 2-hour session on Zoom.
- Quality Evaluation: Designed and analyzed participant feedback surveys to measure educational impact and session satisfaction.
- Performance Metric: Achieved an outstanding average score of 4.7/5.0 across all categories, with high praise for material clarity and delivery.
